License usage report

October 2026 / Month to date

alex.morgan@example.com / Kiro Pro / Nesting level 2 / Business days only

Current billing-cycle capacity

01 Oct 2026, 00:00 UTC to 01 Nov 2026, 00:00 UTC

Allowance consumed **70.0%**	Official credits / allowance **1,400.00 / 2,000.00 credits**	Credits remaining **600.00**	Overage consumed **0.00 credits**	Overage status **Disabled**
Business cycle elapsed **63.6%**	Projected cycle demand **2,200.00 credits**	Estimated exhaustion **28 Oct 2026**	Before reset **2 business days**	

Forecast: official credits per elapsed business day, including today when it is a business day. Remaining demand starts on the next business day; assumes unchanged demand. Official totals include all account usage.

Recorded project allocation

1,268.00 credits / 4 folder groups / Local business-day usage, approximate

Project	Local credits	Local share	Allocation
/work/payments-api	944.00	74.4%	
/work/customer-portal	194.00	15.3%	
/work/platform-infra	90.00	7.1%	
/work/developer-tooling	40.00	3.2%	
Total	1,268.00	100.0%	

Project = working directory collapsed to nesting level 2, counted from the filesystem root. Shares use the local monthly total.

Daily credits by project

October 2026 / 22 business days / Monday-Friday; public holidays not configured

Credits per cell / fixed colour bands / — = future date

Daily attribution uses session last-update dates in UTC. Zero means no retained allocation, not confirmed inactivity. Today's column, when present, is partial.

Data coverage

Retained local CLI business-day allocations only; weekends and configured public holidays excluded. IDE activity is excluded. Cumulative session credits follow the last update date and recorded model. Sessions spanning months or switching models can distort daily/monthly allocations. Historical official totals are unavailable; local allocations need not match official consumption.
